

Your Home for Preventative Maintenance Solutions

Infrared Thermography

“IF IT USES POWER, IT WILL GET HOT BEFORE IT FAILS”

Infrared Thermography is the only predictive maintenance tool that lets you see and analyze thermal performance.

Maintenance Technology magazine reported a \$4.00 return on investment for every \$1.00 spent on thermal inspection.

Pinnacle Services Inc. provides infrared thermography services for preventative maintenance programs. We offer complete facility scans or individual component scans. High quality reports are included and can be customized to meet your industries requirements.
